

**Dean's Professors Program
Effective July 1, 2024**

Samueli School of Engineering's Dean's Professors are tenured engineering faculty whose recent achievements in scholarship hold extraordinary promise for world-class contributions to knowledge and are committed members of their Department and the School.

The Dean's Professor distinction is for three years and carries an award of up to \$25,000 per year in discretionary funds and/or student support. These funds are meant for direct support of the Dean's Professors research programs, and not for salary support. This title may be renewed for a second three-year period only under exceptional circumstances, with no possibility for further renewal. There can be a maximum of 3 Dean's Professors, at any one time.

Nominations will be reviewed by a committee consisting of an appropriate subset of Associate Deans and Department Chairs. The final decision will be made by the Dean, after receiving the committee's evaluation.
